Exhaust pipe seal obsolete

Models: all gas, MD - BY models

Exhaust pipe seal ("flapper") 3853864 and its mounting parts are obsolete. Testing has determined that these parts are not needed.

If any of these parts fail, they can not be replaced. Remove all seal parts; the seal, pin and bushings, from exhaust system.

After removing seal parts, re-install exhaust bellows over exhaust pipe.

& Caution! Make sure bellows completely covers all holes in exhaust pipe. If holes are not covered exhaust and water will enter engine area. Securely tighten clamps on bellows.

Replacement exhaust pipes for these engines do not have holes for seal assembly. Do not drill holes in new pipe to install the seal, discard seal parts.
