ECM Replacement

Models: WT and EF 4.3L, 5.0L, 5.7L, 7.4L

Affected models:
WT and EF fuel injected engines that were equipped with MEFI 3 ECMs.

MEFI 3 ECMs are no longer available from the supplier.

MEFI 4 ECMs are now used to service these engines. The MEFI 3 ECMs have been replaced by a MEFI 4 ECM and other parts, depending on model.

When a MEFI 3 ECM is ordered, it is replaced in the Parts' system by:
- MEFI4 ECM
- ECM Adapter Harness (A)
- Fuel pump power harness (B) (not used on 7.4L)
- Instructions
- Decal
- Tie straps

Some replacements also include a MAT (IAT) sensor kit.

Assembly procedures are covered in the instructions that are part of each replacement.

NOTICE! Use all parts provided by the replacement. Follow the instructions to insure proper operation of the new ECM.
