Sprayplate for DPH Drive
Models: DPH Sterndrive

Volvo Penta have developed a sprayplate to reduce spray when using DPH sterndrives.

Depending on the hull shape in combination with positioning of the drive an unusual amount of spray may occur.
To reduce spray a sprayplate can be mounted on to the drive.

A sprayplate kit is now available through parts sales.

Sprayplate Kit No: 3887293
Installation instruction: 7746336 (included in kit)
