QL Bow Thrusters Program Update

Models: QL Accessories

Distribution: Parts Date: 04-2009 Binder: Parts Replaces:

The current control unit PIN 41100658 for the BP series as spare part for products listed below are updated with a new version.

The new control unit features new safety functions as well as the possibility to upgrade to wireless remote control operation.

Thrusters

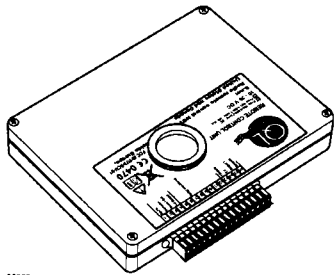

BP300
BP450
BP600
BP800
BP900
BP 1200
BP 1300

The new control unit's is released as listed below.

New PIN	Market	
21281780	EUIESS	CE 0470
21313484	US/Canada	FCC-approved

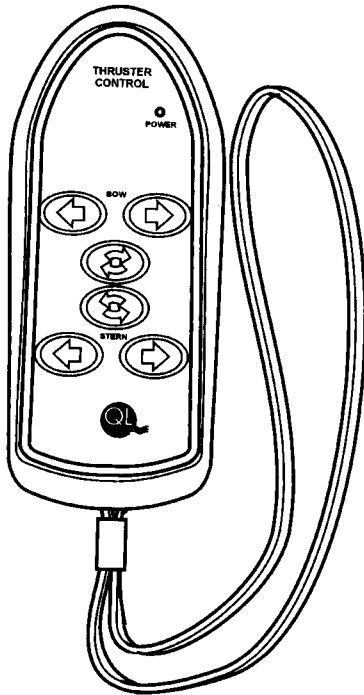

Important: reason for two new PIN's are that the control unit's are pre loaded with radio receiver for wireless remote control. Please check what *radio directives* apply for your market before installation of wireless remote control.

Normal use with Joystick, Rocker switch or Touch panel are not affected by any radio directive.

For wireless remote control operation a remote control is needed that needs to be ordered separately.

PIN	Market	
41100887	EUIESS	CE 0470
41100888	US/Canada	FCC-approved

Note the remote control unit and the control unit must have a market match for proper operation. For more information please look in publication 774827402.2009.
