Charging Distributor, PIN 873120-0, Petrol Engines

Referring to prior Parts Info 52-07, dated 1994-02-01, in which special instructions and recommendations for the installation and use of charging distributor 873120-0 on petrol engines, were given.

The limitation of use of the charging distributor together with the 12V/65A alternator (fuel injected petrol engines) is no longer valid for engines of 1995 year model, with the designation "HU".

Thus, charging distributor 873120-0 is now recommended for all 1995 year petrol engines with designations "HU". For installation, see the enclosed instruction for Prestolite alternator.

A revised complete installation instruction for charging distributor 873120-0, is presently under production.

Encl. Installation instruction
