

# QL Bow Thruster

## **I am after a left hand propeller for the QL 450 bow thruster. Is it possible to obtain one? Part number 41100689.**

I am sorry, but props (and parts) for the QL line are just about impossible to get. QL was purchased by Side Power (who makes their own

version of Bow thrusters) and then shut down.

Volvo Penta had some of the parts in stock as did a company called Engbo out of Florida, but neither of them have this prop.

It may be time to get rid of the entire QL bow Thruster and swap over to a Vetus or a Lewmar or something similar. Unfortunately

there is no easy swap over and does require a fair amount of work to get the newer versions to fit on your boat.
