

Volvo Penta

Volvo D4-300, D4-300D-B Question

Dears,

I need a few parts for my Volvo D4 300. I was wondering if you could be so kind to provide the full schematics for my engines. Would you have it in PDF format? The matter is that my mechanics do not speak English so I'll have to use the prints to select the parts together with them.

Thanks in advance

Best regards

Hello Sir:

All of the D4-300 schematics are on our website (marinepartsexpress.com). Here is a link that will get you to overall section http://www.marinepartsexpress.com/vp_sch_fs.html

But remember that you will need to know which D4-300 you have (such as D4-300D-B).

I can supply shop manuals for these engines in Spanish if you want them, but I can't supply parts books in anything other than English. Most people use the on-line schematics for parts identification, but if you want to purchase actual parts books they are available in about three weeks (they are printed on demand) and cost about \$75 each.

If you would rather just give me a list of the parts (along with the serial number of the engine), I could find the part numbers for you and give you a quote.
