

Volvo Penta

Volvo 3807943 Plastic Prop Blades NLA Question

Hello:

I am sorry, but the plastic props 3807943 are no longer available. I have not been able to find anyone who has these. However, I can supply a complete prop (hub and blades).

Please let us know what you would like to do.

J. D. Neeson

Hi JD,

I have a question on the quote. I understand the kit, but what is the replacement part number with quantity of 4 at \$24 each?

Thanks,

Hello:

The quantity of four are the old plastic prop blades that don't exist anymore. This number was the last number before they went obsolete.

Now you have to purchase the whole prop. If you do want to go this way, it might make sense for you to tell me what props you have and what you need so I can confirm that we have quoted you the right entire prop.

Unless you love these plastic blades I would be tempted to switch over to an aluminum or SS set. As you probably know the XDP drives are going the way of all flesh and are no longer being manufactured.

Attached is a memo that will be going out today to XDP owners about Volvo Penta's new program.

Thank you,

JD
