

Volvo Penta

Hi...the part# for the v-belt on your site is 966978...I got a new # somewhere of 966382 so don't know if it goes by that 3 also, anyway my question is....Is this a "double" belt kit or do I buy 2 of these?I have the double belt alternator pulley on my tamd41a, Thanks, Mike

Hello:

The alternator belt kit contains 2 belts with a number 966978. The 966382 is single alternator belt that was originally specified for a TAMD22A engine. So the 966978 kit is made up of two 966382 belts. So you can purchase two 966382 belts or one belt kit 966978,

We have them in all manifestations.

JD.
