

# Volvo Penta

## **I ordered the prop remover tool #3855877 and have not received it yet. Is it available?**

The Volvo Penta part number 3855877 tool (removes outer prop shaft housing on DPS-M) has been back ordered for weeks and Volvo Penta is unsure when it may come available.

We have come up with a work-around for this tool (3855877-3861659 MPE) that works well.

It actually works better than the original tool as it is substantially stronger and provides a heavier [support](#) for a [socket](#)

The price for the 3855877-3861659 MPE is \$135. We have plenty in stock.

Unique solution ID: #1248
