

Volvo Penta

I need transom shield #21176076. Do you have any available?

The 21176077 in the kit that includes the 21176076 and all the parts

below it with the little dot (like the studs and the seas).

Most times better to purchase the whole kit.

The other option, depending what has happened, is to get a complete transom shield kit (includes the shield, the rams, the pump, the inside and all the hardware) about \$4500, but a lot less labor.

[Shield schematic](#)

Unique solution ID: #1269
