

Volvo Penta

Volvo Synthetic Diesel Oil Question

Hello Sir:

I did not order this yet as you asked for the engine oil 1141626 which turns into 40005015. This is synthetic diesel oil and Volvo Penta no longer supplies this oil.

What the manual for the D3-200 recommends is VDS-3 oil (non synthetic oil). I quoted this type, but you are not supposed to mix synthetic and non-synthetic together so if you have been using synthetic you might want to continue to do so.

While Volvo Penta no longer supplies synthetic diesel oil, I can supply it as an aftermarket part.

Please let me know.

J.D.
