

Volvo Penta

Volvo Expired Hoses Question

Hello:

You ordered two expired hoses 3860019 and 3860298. They have been expired quite awhile I can probably get these for you (or an equivalent ones), but I need to know where they are and where they go to and from.

I suspect that these are part of a F/W cooling kit so I included a schematic showing one that was used on a similar engine. Don't worry about the part numbers from the schematic, but if you could ID which hoses you need, I should be able to find them for you.

J.D.
