

Volvo Penta

Volvo DP-H Prop Shaft Question

Hello:

I am sorry, but the prop shafts on the DP-H drives are unique enough that I can't offer an alternative to the G props.

From time to time we get used props sets in so I can keep your name.

Also there is a company that claims that they are going to begin to offering aftermarket versions of this prop. Try me again in about two months and you can give these a try. This is the same company that came out with DP-S aftermarket props and we have had a couple of customers like them.

J.D.
