

Volvo Penta

Volvo TAMD41 Compressor Question

Hello!

I stand AD41 two engines(TAMAHA SC32) if you have parts to upgrade the KAD42. It compressors with accessories, Thanks

Hello Sir:

If I understand, you want to know if you can put compressors on your TAMD41 engines.

While they will fit on your engine they won't work unless you do the following:

Replace all the injectors,
Recalibrate the fuel injection pump
Add cooling and oil lines
Add the exhaust pipes and change the front belts and pulley system
Replace all the pistons (different combustion chambers at the top of the piston).

So it is really not worth doing it. The 42 series is the same size as the 41 so if you find a 42 engine it will fit in the same place as the 41.

Hope this helps and please feel free to contact me if you want any further information.
